1	The program is very unstructured and unorganized. The curriculum is off and does not line up with the objectives. The instructors don't communicate with each other, less alone the students. The syllabus changes without notice, so do dates. There are no supplies, we never have what we need. The program needs some reevaluating.		
2	This program Needs more structure and organization.		
3	The online program was great. It gave everyone the change to work and go to school at the same time.		
4	Need to get some better teacher		
5	I would strongly recommend that this program be more structured and organized. I would also HIGHLY suggest having more than one instructor, and that expectations should not only be placed on students but faculty as well.
